OBJECTIVES

Aspiring full-stack developer skilled in React.js, Node.js, Express.js, MongoDB, JavaScript, and Tailwind CSS. Seeking an opportunity to contribute to real-world projects, strengthen front-end and back-end development skills, and grow into a strong Software Engineer

WORK EXPERIENCE

Shubham Tanks and Liners | Full Stack Developer / Intern

Jan 2025 - Present

- Built 3+ internal web tools from scratch using React, Tailwind CSS, Node.js & MongoDB.
- Developed a Daily Sales Activity Form & Dashboard to track sales team performance in real time.
- Used ChatGPT & AI tools to automate reports and templates, improving team efficiency.
- Handled full debugging, testing, and documentation independently in a no-mentor environment.

PROJECTS

MedyGo (Doctor Appointment System) - [Live Link](#) / [Source Code](#) | Full Stack MERN Project

Tech Stack: React.js, Node.js, Express.js, MongoDB, JavaScript, HTML, CSS.

- Built a full-stack doctor appointment system with three roles: Patient (user), Doctor, and Admin.
- Single front-end for patient authentication and a separate for admin/doctor front-end.
- Patients can search doctors by specialty and book appointments; bookings saved in **MongoDB**.
- Doctors can accept, cancel, or mark appointments as completed from their dashboard.
- Admin dashboard to view all bookings (booked / cancelled / completed), add doctors, and set doctor availability.
- Implemented **RESTful APIs**, **JWT authentication**, and end-to-end frontend back-end integration.

Finance Tracker App - [Live Link](#) / [Source Code](#) | Full Stack Project

Tech Stack: React.js, HTML, CSS, Firebase

- Developed a finance tracking web application to help users manage and monitor their expenses.
- Integrated Firebase for real-time database and user authentication.
- Designed a clean, responsive UI with React for smooth user experience.
- Implemented features like transaction history, add/delete/edit functionality, and dynamic balance updates.
